While it sounds like a great idea in theory, users have been disappointed to find that LG has approved a measly 15 widgets since the TVs were released.. A ton of progress has been made already, as they have been able to install their own busybox environment as well as open the sets to accept more widgets via some clever signature spoofing.. The rating table will be updated by downloading the RRT5 data for The Plus button opens the full screen version of the Card.. The ultimate goal for the project is to completely divorce the sets from the Yahoo platform and replace it with their own open marketplace..
